

Tesung Lin

📍 China • Beijing

🔗 Profile

- Phone (+86) 18763386500
- Email linesong666@163.com
- GitHub github.com/shinoda4
- Website desonglll.xyz
- FDE / full-stack engineer delivering AI products from requirements to production
- Strong in structured AI-assisted engineering (Vibe Coding) and rapid cross-stack delivery
- Experienced in gRPC, LLM gateways, container delivery, and incident response

🔧 Technology

- Languages: Rust, Python, TypeScript, Go | Swift (AI-assisted / Vibe Coding)
- Client / Web: SwiftUI, React | gRPC, REST, SSE
- Data: PostgreSQL, Redis
- AI Engineering: LLM gateways, model routing, streaming inference | structured AI collaboration
- Delivery: Docker, Kubernetes, Git, Shell | macOS, Linux
- English: CET-6

🎓 Education

■ Qufu Normal University - MEng in Software Engineering (ongoing) 2024/09 – 2027/06

- Official Reviewer, International Joint Conference on Neural Networks (IJCNN 2026, WCCI, IEEE CIS)
- Contributed to a National Natural Science Foundation of China grant proposal
- Coursework: Software Architecture, Requirements Engineering, Distributed Systems, Deep Learning

■ Qufu Normal University - BEng in Software Engineering 2020/09 – 2024/06

- Coursework: C/C++, Data Structures, Computer Architecture, Operating Systems, Computer Networks
- Served as vice president of the school student union and head of its organization department

📁 Experience

■ Beijing Dimension Gate Technology Co., Ltd. 2026/07 – Present

FDE (Forward Deployed Engineer) Beijing, China

- **End-to-end AI delivery:** Translate meeting intelligence and AI reading requirements into client, API contract, gateway, and console capabilities; own solution design, implementation, integration, release, and production issue closure.
- **MinuteX / Readooow iOS:** Deliver two SwiftUI and gRPC applications covering multi-speaker transcription, resumable summaries, recording playback, segment editing, voiceprints, AI reading, streaming chat, and learning journeys.
- **LLM Gateway:** Maintain a Rust multi-provider gateway with OpenAI-compatible APIs, model/channel routing, quota billing, usage analytics, TTS, voice cloning, ASR, OpenAPI documentation, tests, and error diagnostics.
- **Platform Console:** Build a React / TypeScript administration console for models, tokens, users, quotas, request logs, statistics, group authorization, service deployment, and gateway troubleshooting.
- **sync-k8s:** Contribute to a Go multi-cluster Kubernetes platform that mirrors resources into PostgreSQL and provides resource search, logs, terminals, metrics, and GitOps deployment and rollback.

■ SiliconFlow Technology Co., Ltd.

2026/03 – 2026/06

R&D Intern

Beijing, China

- **CCE:** Built ComfyUI environment and image packaging workflows for batch plugin cloning, dependency merging, Docker image builds, and verified multi-source model downloads.
- **ComfyAgent:** Developed a FastAPI ComfyUI gateway with request processing and output caching.
- **BizyDeploy:** Developed a cloud-function deployment CLI and reusable workflow engine with configuration merging and automated deployment.
- **BizyEngine:** Extended the ComfyUI server with model/dataset APIs, API key authentication, third-party integrations, and conversation coordination.

■ Baichen Technology Co., Ltd.

2025/12 – 2026/03

Backend Delivery Engineer / Technical Support

Beijing, China

- Wrote architecture and feasibility sections for government and defense-sector technical proposals with high reliability and security requirements.
- Delivered systems into isolated private networks, including physical server setup, Docker image migration, and database initialization.
- Investigated production incidents and automated log inspection and backups with Shell scripts to improve on-site delivery efficiency.

■ Shunde Machinery Parts Co., Ltd.

2023/02 – 2024/06

Backend Engineer

Rizhao, Shandong, China

Developed and maintained internal inventory, order, and product-data modules operating on real production data.

- Reimplemented a high-frequency inventory calculation in Rust and exposed it to Django through FFI after the original endpoint began timing out.
- Traced API failures and data inconsistencies through application logs and database records, repaired historical data, and restored service availability.
- Deployed Django behind Nginx and managed service processes with systemd for reliable internal access.

📁 Projects

■ MinuteX - AI Meeting Intelligence Client

2026/07 – Present

FDE / iOS Engineer

Beijing Dimension Gate Technology Co., Ltd.

- Built recording, multi-speaker live transcription, and resumable summary flows with SwiftUI, AVFoundation, and gRPC; handled interruptions, background execution, low disk space, and write failures.
- Delivered transcript segment editing, summary regeneration, voiceprint enrollment/binding, history search, and sharing; integrated shared Protobuf contracts, structured diagnostics, and TestFlight release automation.

■ LLM Gateway / Platform Console / sync-k8s - AI Infrastructure

2026/07 – Present

FDE / Full-stack Engineer

Beijing Dimension Gate Technology Co., Ltd.

- Built Rust multi-model access and governance with OpenAI-compatible chat, TTS, voice cloning, and ASR APIs, plus routing, tokens, quota billing, usage aggregation, and request logs.
- Delivered the React / TypeScript gateway console with group authorization, model/token configuration, quota requests, usage trends, diagnostics, and service deployment workflows.
- Contributed to a Go and PostgreSQL Kubernetes mirror and operations gateway with dynamic CRD discovery, OIDC authorization, live operations, and versioned Kustomize GitOps deployment and rollback.

■ AX - Full-stack Social and Content Distribution System

2023/06 – 2024/06

Independent Developer

Software Copyright 2026SR0178137

- Built an asynchronous backend with database access, distributed sessions, unified responses, and structured error handling.

- Designed data models and counters that preserve consistency for ranking, reactions, and user statistics.
- Implemented multimodal file deduplication, chunked transfer, and personalized content ranking.

✂ Professional Skills

■ Client and Real-time Communication

- SwiftUI state management, iOS audio capture, lifecycle resilience, interruption recovery, background execution, and local persistence.
- Cross-platform Protobuf / gRPC contracts, streaming responses, authentication state, structured errors, and compatibility management.

■ Backend and AI Gateways

- Asynchronous Rust / Python APIs and LLM gateways with model routing, streaming inference, billing, usage analytics, and diagnostics.
- PostgreSQL / Redis data modeling and state management with attention to consistency, query performance, and production recovery.

■ Engineering Delivery

- Docker / Kubernetes deployment and environment integration, with Shell automation for builds, tests, releases, and operational checks.
- Structured AI-assisted engineering: decompose requirements, organize context, drive cross-stack implementation, and close delivery through tests, code review, and device validation.

🐦 Academic Service

- DFA-SAGE: A Dual-Fusion Aggregation Graph Sampling and Embedding Model for Enhanced Intrusion Detection (major revision at Computer Networks)
- Official Reviewer, IJCNN 2026 (WCCI, IEEE CIS flagship conference)

🏆 Honors and Awards

■ Software Copyrights

- | | |
|--|---------|
| • AX - Rust Full-stack Social Media System (2026SR0178137) | 2026/01 |
| • E-Heyuan Campus Services Platform (2023SR0235691) | 2023/02 |
| • Party and Youth League Assistant (2023SR0137018) | 2023/01 |

■ Competitions

- | | |
|--|---------|
| • China Mobile Wutong Cup Digital Innovation Competition, Shandong 2nd Place (national finalist) | 2026/02 |
| • National College Mathematics Competition, Shandong 1st Prize (national finalist) | 2023/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Party Assistant) | 2022/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Jixu You Ning) | 2022/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Dang Bang Bang) | 2021/11 |

■ Distinctions

- | | |
|---|-------------|
| • Outstanding Graduate of Shandong Province Qufu Normal University | 2023 – 2024 |
| • Graduate Scholarship (2024) Undergraduate Scholarships (2021, 2022, 2023) | 2021 – 2024 |
