

Tesung Lin

📍 China • Beijing

🔗 Profile

- Phone (+86) 18763386500
- Email lindesong666@163.com
- GitHub github.com/shinoda4
- Website desonglll.xyz
- FDE / full-stack engineer delivering AI products from requirements to production
- Strong in structured AI-assisted engineering (Vibe Coding) and rapid cross-stack delivery
- Experienced in gRPC, LLM gateways, container delivery, and incident response

🔧 Technology

- Languages: Rust, Python, TypeScript, Go | Swift (AI-assisted / Vibe Coding)
- Client / Web: SwiftUI, React | gRPC, REST, SSE
- Data: PostgreSQL, Redis
- AI Engineering: LLM gateways, model routing, streaming inference | structured AI collaboration
- Delivery: Docker, Kubernetes, Git, Shell | macOS, Linux
- English: CET-6

🎓 Education

■ Qufu Normal University - MEng in Software Engineering (ongoing) 2024/09 – 2027/06

- Official Reviewer, International Joint Conference on Neural Networks (IJCNN 2026, WCCI, IEEE CIS)
- Contributed to a National Natural Science Foundation of China grant proposal
- Coursework: Software Architecture, Requirements Engineering, Distributed Systems, Deep Learning

■ Qufu Normal University - BEng in Software Engineering 2020/09 – 2024/06

- Coursework: C/C++, Data Structures, Computer Architecture, Operating Systems, Computer Networks
- Served as vice president of the school student union and head of its organization department

📁 Experience

■ Beijing Dimension Gate Technology Co., Ltd. 2026/07 – Present

FDE (Forward Deployed Engineer) Beijing, China

- **End-to-end AI delivery:** Translate meeting intelligence and AI reading requirements into client, API contract, gateway, and console capabilities; own solution design, implementation, integration, release, and production issue closure.
- **AI client products:** Primary contributor to MinuteX for iOS / macOS and Readoow for iOS, covering live transcription, meeting summaries, voiceprints, AI reading, and streaming chat while integrating shared Protobuf contracts across clients.
- **Platform and delivery tools:** Contribute across a Rust LLM gateway, React console, Go platform services, and Kubernetes operations tooling, closing gaps in model integration, access control, image management, deployment, and troubleshooting.

■ SiliconFlow Technology Co., Ltd.

2026/03 – 2026/06

R&D Intern

Beijing, China

- **CCE:** Built ComfyUI environment and image packaging workflows for batch plugin cloning, dependency merging, Docker image builds, and verified multi-source model downloads.
- **ComfyAgent:** Developed a FastAPI ComfyUI gateway with request processing and output caching.
- **BizyDeploy:** Developed a cloud-function deployment CLI and reusable workflow engine with configuration merging and automated deployment.
- **BizyEngine:** Extended the ComfyUI server with model/dataset APIs, API key authentication, third-party integrations, and conversation coordination.

■ Baichen Technology Co., Ltd.

2025/12 – 2026/03

Backend Delivery Engineer / Technical Support

Beijing, China

- Supported government and defense-sector proposals and private delivery into isolated networks, including server setup, Docker image migration, and database initialization.
- Handled on-site support and incident response, automating log inspection and backups with Shell scripts.

■ Shunde Machinery Parts Co., Ltd.

2023/02 – Present

Technical Support (Long-term Part-time)

Rizhao, Shandong, China

- **Product catalog platform:** Independently delivered the product management console, showcase website, Spring Boot API, and iOS client, owning requirements, full-stack development, deployment, and long-term support.
- **Core capabilities:** Modeled products, machine models, and fitment relationships for heavy-machinery parts, with search, image management, access control, and PostgreSQL backup and recovery.
- **Core module rewrite (Rust FFI):** Reimplemented a high-frequency inventory calculation in Rust and exposed it to Django through FFI after the original endpoint began timing out.

📁 Projects

■ MinuteX / Readooow - AI Meeting and Reading Clients

2026/07 – Present

FDE / Client Engineer

Beijing Dimension Gate Technology Co., Ltd.

- Primary developer across MinuteX for iOS / macOS and Readooow for iOS, delivering recording, multi-speaker live transcription, resumable summaries, voiceprints, AI reading, streaming chat, and learning flows.
- Used SwiftUI, AVFoundation, and gRPC to integrate shared Protobuf contracts and backend services; handled audio interruptions, background execution, data recovery, contract upgrades, and TestFlight releases.

■ LLM Gateway / Console / Image Hub - AI Platform Tools

2026/07 – Present

FDE / Full-stack Engineer

Beijing Dimension Gate Technology Co., Ltd.

- Extended a Rust LLM gateway with chat, translation, TTS, voice cloning, and ASR providers, plus channel selection, quota and usage tracking, request logs, diagnostics, and OpenAI-compatible APIs.
- Delivered React / TypeScript administration flows and Go platform APIs for models, tokens, administrators, fine-grained permissions, and image repositories, bringing configuration, release, and troubleshooting into one console.

FDE / Engineering Tools Developer

Beijing Dimension Gate Technology Co., Ltd.

- Contributed user groups, resource-level authorization, auditing, and management integration to a Go multi-cluster platform that mirrors Kubernetes resources into PostgreSQL for search, live operations, and GitOps delivery.
- Primary developer of a Rust CLI for resource queries, logs and events, health monitoring, release preflight, batch deployment, and rollback, supporting day-to-day releases and incident diagnosis from the terminal.

■ FocusBoard - Smart macOS Task Manager

2026/08

Independent Developer

Personal Project

- Built a native SwiftUI three-column workspace that turns natural language into scheduled, prioritized action steps; supports OpenAI-compatible services and falls back to local rules when AI is unavailable.
- Kept data local with Keychain-protected API keys, versioned backups, corruption recovery, and regression tests for parsing, state transitions, configuration migration, and persistence.

✂ Professional Skills

- **Clients and communication:** SwiftUI, iOS audio and lifecycle resilience; cross-platform Protobuf / gRPC contracts, streaming responses, authentication, and compatibility handling.
- **Backend and data:** Asynchronous Rust / Python APIs and LLM gateways; PostgreSQL / Redis data modeling, state management, and production recovery.
- **Engineering delivery:** Docker / Kubernetes integration and Shell release automation; structured AI-assisted implementation validated through tests, code review, and device checks.

🐦 Academic Service

- DFA-SAGE: A Dual-Fusion Aggregation Graph Sampling and Embedding Model for Enhanced Intrusion Detection (major revision at Computer Networks)
- Official Reviewer, IJCNN 2026 (WCCI, IEEE CIS flagship conference)

🏆 Honors and Awards

■ Software Copyrights

- | | |
|--|---------|
| • AX - Rust Full-stack Social Media System (2026SR0178137) | 2026/01 |
| • E-Heyuan Campus Services Platform (2023SR0235691) | 2023/02 |
| • Party and Youth League Assistant (2023SR0137018) | 2023/01 |

■ Competitions

- | | |
|--|---------|
| • China Mobile Wutong Cup Digital Innovation Competition, Shandong 2nd Place (national finalist) | 2026/02 |
| • National College Mathematics Competition, Shandong 1st Prize (national finalist) | 2023/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Party Assistant) | 2022/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Jixu You Ning) | 2022/11 |
| • Shandong Collegiate Software Design Contest, Provincial 2nd Prize (Dang Bang Bang) | 2021/11 |

■ Distinctions

- | | |
|---|-------------|
| • Outstanding Graduate of Shandong Province Qufu Normal University | 2023 – 2024 |
| • Graduate Scholarship (2024) Undergraduate Scholarships (2021, 2022, 2023) | 2021 – 2024 |
